U.S. Patent and Trademark Office PTOL-303 (Rev. 08-06)

Part of Paper No. 20061017

Continuation of 11. does NOT place the application in condition for allowance because: The fiber of Paparpaaskeva, being of any type, includes the possibility of ampifying fiber, which reads on the claimed limitation "optical amplification media segments". The concept of teaching away from a reference is inapplicable, since claims 1, 2, 4, 5-8, 10-13, 16 and 21 were rejected under 35 U.S.C. 102(e). Claim 5 of Papaparaskeva includes the case of an wavelength dropping function at each node, i.e. after each optical amplification media segment. With regard to claims 6-8, the frequency spacing (wavelengths) of the signal light are disclosed in para. [0053]. With regard to claims 12-13, the pump light source and coupler to the amplification medium are inherent in the optical amplifiers. With regard to claim 16, Erbium doping of the optical fiber is mentioned in para. [0018]. With regard to claim 21, optical power monitoring is disclosed in para. [0028]. With regard to claims 2, 4, 5, 10 and 12, the specific wavelengths are merely a design choice within the S-band and L-band, where the EDFA s of Papaparaskeva would operate. With regard to claims 17-20, the motivation to combine Shimojoh with Paparaskeva is found in 1st col. lines 10-19 of Shimojoh.
